Seeking Summer 2027 UX / Product Design Internship

EDUCATION

University of Illinois Urbana-Champaign

Bachelor of Science in Information Sciences · Expected May 2028

GPA: 3.87 / 4.00 · Major focus: UX/HCI

SELECTED PROJECTS

Case studies & demos: gavinw06x.github.io/portfolio

MatchMate - Live Match Rooms for Football Fans Abroad

Product & Interaction Designer · Solo Project · iPhone App Prototype · 2026

- Redesigned a football-fan social app's information architecture and flows around shared live viewing, building on interview findings about isolation among fans following less mainstream leagues abroad.
- Prototyped ten flows around a simulated live match with chat translated across four languages, refined through a Nielsen heuristic review that added spoiler-safe entry, message retry, and undo for key actions.

QuadGo - Gamified Campus Fitness App

UX Researcher & Product Designer · Figma · Spring 2026

- Conducted surveys and user interviews to identify barriers to exercise motivation and accountability among college students, translating findings into a gamified fitness app concept.
- Created end-to-end user flows, a design system, and high-fidelity screens across onboarding, dashboard, map, challenges, rewards, and social features.
- Led three rounds of usability evaluation and heuristic review, refining navigation and task flows based on user feedback and identified usability issues.

Netsuke Tiger Viewer - Interactive Digital Museum Experience

UX Designer & Developer · HTML, CSS, JavaScript, Google Model-Viewer · Spring 2026

- Designed and built an interactive 3D viewer for a 19th-century Japanese netsuke from the Krannert Art Museum, combining hotspot navigation, contextual storytelling, and audio narration.
- Organized historical research into contextual content and information hierarchies to support exploration of the artifact.
- Conducted usability walkthroughs and refined hotspot discoverability, navigation, and camera controls; deployed the experience through Vercel.

EXPERIENCE

DookBook - Shanghai, China

Design Intern · Summer 2026

- Researched market trends and target readers' emotional and reading needs to inform book cover and publishing product design.
- Applied visual hierarchy and information architecture to prioritize content and guide readers' attention across covers and book products.
- Refined design concepts through multiple rounds of product review, incorporating feedback on audience fit, information clarity, and emotional appeal.
- Used generative AI for research synthesis, ideation, and visual exploration to support faster iteration, evaluating outputs against audience needs and design goals.

SKILLS

Design: Figma, Adobe Creative Suite, Wireframing, Prototyping, Interaction Design, Information Architecture, Design Systems

Research: User Interviews, Surveys, Usability Testing, Heuristic Evaluation, Market Research, Competitive Analysis

Technical: HTML, CSS, JavaScript, C++

Tools & Workflows: Miro, Notion, Jira, Generative AI-Assisted Research and Design
